

Vs4

Setting the highest standards for today's waterless printing.

- Effortless and trouble-free waterless printing
- Faster make-readies
- Increased productivity
- Reduced ink consumption
- Immediate post-print processing
- Compatible with all waterless plates and presses

If you want to experience more tonal contrast, beautiful shades of color and incredible saturation when printing waterless, you'll want to experience Vs4 ink from Van Son. Today, waterless ink is as much of an art as it is a science. And when it comes to choosing a waterless ink, nothing compares to Van Son's Vs4. Compatible with all waterless plates and presses, it dries hard and fast to a high gloss surface, offering your print application a high density and a dot pattern that is virtually invisible.

Known to have the industry's widest Critical Tone Temperature (CTT), Vs4 will resist toning and mottle in a broad range—63°F - 97°F. Developed to deliver excellent press stability, quicker drying times and lower heat buildup, Vs4 also delivers less downtime and higher productivity. Enjoy brighter, more balanced print jobs that include color detail sure to please your most discriminating customer. ***Vs4 from Van Son—reliability that keeps you printing.***
